Anno Accademico 2018-2019

Version 1.0

Part I

Informal description of the problem

Chapter 1

Introduction

1.1 Purpose

This document will provide an analysis of requirements and specifications of new services the *TrackMe* company is willing to launch. *TrackMe* is a company that wants to develop a software-based service allowing third parties to monitor the in and health status of individuals. Said services are described below.

- ***Data4Help*** allows *TrackMe* to gather data from users and to provide them to third-parties upon request.
- ***AutomatedSOS*** lets third-parties provide assistance to elderly people in case of sudden illness by sending them an ambulance.
- ***Track4Run*** allows organisation of runs, by path definition, participant subscription and tracking through *Data4Help*.
